

STEFAN SPATARO

System Analyst

stefanspataro@hotmail.com www.stefanspataro.com 250-837-1192 Kelowna BC, Canada

PROFESSIONAL PROFILE

Systems Analyst supporting mission-critical clinical applications at Interior Health, with a UBC Computer Science degree and CCNA certification. Supports the surgical portfolio across sites including Meditech SUR, the Picis clinical suite, and HL7 integration, and leads a dental imaging implementation through security and privacy assessment. Brings a development background in full-stack web applications, LLM API integration, and cloud deployment, alongside a networking foundation.

CORE COMPETENCIES

- Clinical Systems: Meditech SUR, Picis (OR Manager, Preop Manager, PACU Manager), HL7/Mirth integration, SmarTrack.
- Technical: Python, TypeScript, SQL, React/Node, SQL, Linux, PowerShell, Active Directory, Wireshark.
- Professional: Vendor liaison and escalation, requirements gathering, technical documentation, security and privacy assessment, data analysis and reporting

CERTIFICATIONS

CISCO

CCNA Cisco Certified Network Associate (Feb 2, 2026)

Routing, switching, network security, and automation. Maintain a home lab on a Cisco 2811 ISR and Raspberry Pi for LAN monitoring and diagnostics using Wireshark, tcpdump, Nmap, and netmiko.

EDUCATION

B. SC. COMPUTER SCIENCE

University of British Columbia Okanagan (2021– 2025)

Primarily focus on software development, network fundamentals, data analysis, and systems troubleshooting. Gained hands-on experience in both individual and team-based projects across various programming concepts.

- Built various software systems using Java, TypeScript, Python, C, and SQL.
- Brought many applications from Design to Implementation. Tech stacks include React/Node/PostgreSQL, LAMP, and Django. Primary language experience is with Typescript.

WORK EXPERIENCE

ANALYST 1, SURGICAL & INFECTION CONTROL SYSTEMS, DIGITAL HEALTH

Interior Health, Kelowna BC (Apr 2026 – Now)

Provide operational and technical support for the surgical application portfolio across Interior Health acute sites, spanning perioperative clinical systems, instrument tracking, and integration infrastructure. Act as vendor liaison and site-facing escalation point for surgical services support.

- Support Meditech SUR and the Picis clinical suite (OR Manager, Preop Manager, PACU Manager) across the full perioperative journey, resolving booking, case record, and documentation issues affecting live OR workflow.
- Maintain dictionary and configuration data driving surgical booking, including procedure and staff dictionaries in Meditech and preference card structures in OR Manager, and support site migrations of booking from OR Manager to Meditech.
- Troubleshoot HL7 message flow through the Mirth integration engine, diagnosing failed and queued case record transmissions between Picis and Meditech and restoring downstream document delivery.
- Support SmarTrack instrument tracking, including barcode scanning hardware in OR and sterile processing environments, isolating faults across the device, workstation, and application layers.
- Perform server and interface monitoring for surgical systems, identifying service disruptions proactively and coordinating remediation with infrastructure teams.

- Lead the VistaSoft dental imaging implementation, authoring the Security Self-Assessment and Privacy Impact Assessment and conducting a site-by-site device compatibility analysis across twelve sites to replace end-of-life software ahead of a Windows 11 migration.
- Coordinate with external vendors and internal server, desktop, and privacy teams on scheduled maintenance, service account and credential changes, and integration changes to mission-critical clinical systems.
- Author and maintain technical and clinical workflow documentation, including end-to-end mapping of the surgical patient journey to supporting application interventions.

ANALYST 1, PATIENT SCHEDULING (CWS)

Interior Health, Kelowna BC (Nov 2025–Apr 2026)

Provided operational and technical support for a mission-critical patient communications platform in a complex, integrated enterprise environment, collaborating with vendors, internal stakeholders, and clinical users to ensure system reliability and continuous service delivery.

- Developed and coordinated solutions during a third-party system migration with a fixed vendor deadline, ensuring a smooth transition and minimal disruption to users.
- Configured, maintained, and supported an automated patient communications platform, performing data analysis and statistics gathering to support business decision making.
- Identified software defects, submitted Voice of Customer requests, and translated user requirements into system configurations and supporting documentation.

FREELANCE IT SUPPORT TECHNICIAN

Self-Employed (May 2025 – Aug 2025)

- Installed and configured VPN solutions and endpoint security software.
- Performed Windows system maintenance and updates across client machines.
- Provided troubleshooting and technical support for networking and system issues.
- Migrated a production WordPress website from GoDaddy to NixiHost, including DNS updates, file/database transfer, and service validation with minimal downtime and redundant backups.

RESEARCH MENTEE

University of British Columbia Okanagan (Dec 2024 – May 2025)

Worked with a professor on a software development research project focused on education technology. Designed and built a React web application that generates Canvas-compatible quizzes using a large language model.

- Developed and tested a user interface for customizing quiz generation
- Integrated OpenAI's LLM API to dynamically produce QTI-formatted quiz content based on user input.
- Implemented a quiz history feature utilizing Neon PostgreSQL cloud database.
- Deployed the application using Vercel and Railway, implemented a CI/CD pipeline with production safeguard checks.

IT TECHNICIAN

Westwood Fine Cabinetry (May 2023 – Sept 2023)

Gained hands-on experience in software development and IT support within a manufacturing and engineering environment. Collaborated on internal tools to streamline operations and improve customer support efficiency.

- Provided remote IT support to dealer clients for company software, diagnosing and resolving desktop issues in real-time using Anydesk.
- Developed Windows Forms (WPF) applications in Visual Basic with SQL Server integration for data entry and internal workflows.
- Designed and deployed custom applications, including a dealer dashboard and IT support ticket manager, to support IT management and operations oversight.
- Analyzed and documented a Raspberry Pi Kiosk system for tracking production with barcode scanning.
